

Vacuum Nozzle for Hard-Floors

ABSTRACT

A hard-floor vacuum nozzle using a wide pivoting cleaning strip 30 to provide cleaning. Felt strip 30 is attached to a stiff pivot support 34 which may be removably connected to nozzle body 24 by pivot clips 32R and 32L. Cleaning strip 30 having at least two stable positions for diverting suction air either in-front of, or in-back of cleaning strip 30 depending on the direction of travel of the nozzle, either forward or backward, respectfully. Open ends formed by end pieces 35R and 35L allow suction air to reach the ends of the cleaning strip to provide edge cleaning. A pivotal hose wand adaptor 40 which is angled to allow a hose wand to be angled parallel to the floor for cleaning under low furniture.
